

Aymane Belassiria

Full stack developer

[in LinkedIn](#) | [website](#) | [aymanebel2@outlook.fr](#) | [GitHub](#)

Experienced Full-Stack Developer skilled in Golang, JavaScript, and Rust. Proficient in React.js, Angular, and Spring Boot, with expertise in microservices architecture, Docker, and CI/CD pipelines. Strong background in API development and database management. Passionate about building scalable, high-performance applications, contributing to open-source projects, and currently learning and implementing Generative AI, AI agents, and Rust to solve real-world problems.

Skills

- Java, JavaScript, TypeScript, GoLang, SQL, PHP, Rust
- React.js, Angular, Spring framework, Express.js, Hibernate, Junit, Docker, Git, Github Action, PostgreSQL, AWS
- Microservices, Full Stack, Agile, Monolithic, Scrum
- Cursor, Vscod, IntelliJ, Claude Code

Experience

GoLang developer - full-time

Polymorpho

Rabat, Morocco(on-site) 08/2025 - Current

- working on a Platform that helps companies stress test their websites using DDoS attacks Like DDosia
 - Responsible for building the whole backend/infra using best practices.
 - Documented projects and provided the frontend team with the required APIs for web client-side integration.
 - Participated in project management using the Agile framework.
 - Wrote attack payloads for bot/agent use cases.
 - Adopted a secure-by-design approach to enhance the security of all application components and collaborate with the security team.
 - Developed a custom communication protocol based on research from the security team.
 - Adopting the monorepo architecture for the project
 - Creating binaries based on the machine's CPU architectures.
 - Using Wails for building the GUI of the desktop solutions.
 - Writing, auditing, and optimizing smart contracts for the project use cases.
 - Using Railgun and ZK-proofs to ensure the anonymity of transactions between agents
- Custom Rust-based Web Crawler and Scraper (Discontinued)...

Full Stack developer - full-time

YouCode

Safi, Morocco(on-site) 09/2024 - 08/2025

- Working as a full-stack developer:
 - Working on an internal coding challenges platform like Leetcode and Hackerrank:
 - Using Golang to communicate with Docker containers to execute and extract submission results using Docker SDK
 - Kubernetes for the orchestration of the execution of containers
 - Frontend using React.js and TypeScript
 - Using Spring Boot for the backend
 - Using GitHub actions to ensure the CI/CD pipeline on VPS
 - Ansible for VPS automation
 - Project management using Jira
 - Usage of Spring AI for AI integration in the project
 - Maintaining a legacy project using native PHP
- Building an internal AI agent to automate the administration process:
 - Using Jupyter to develop and collaborate with other team members
 - Usage of Langchain to process and use the data in the needed documents
 - Integration of [Grad.io](#) for already built components to accelerate the development of the prototype
 - RAG and vectors DB for informing and feeding the LLM about the data required

Full Stack developer - part-time

Quipnex

Slovenia(remote) 02/2024 - 9/2024

Working as a full-stack developer:

- Working on new features in the frontend of the project using Angular, and also in the backend using Spring Boot

- Fixing bugs and performance issues in the frontend
- Migrating the application from Angular 15 to 18
- Project management using Jira and Bitbucket

Full Stack developer - internship

OCP Maintenance Solutions

Safi, Morocco(hybrid) 06/2024 - 09/2024

Working as a full-stack developer(Laravel/React.js, focusing on the frontend part):

- API integration for the application dashboard, optimizing the application for a better user experience
- UI implementation directly from the Figma design, assisting in improving the application architecture
- Maintaining the old application version using native PHP and participating in the migration of the old service to Laravel
- Data manipulation for chart display, responsible for migrating from Webpack to Vite
- dockerizing the frontend and optimizing the project image, and project management using Jira

Full Stack - volunteer

Sahwa(open source)

usa(remote) 05/2024 - Current

I am working as a volunteer full-stack developer for Sahwa.

Sahwa is an open-source learning platform designed to help Palestinian students who have suffered from the war and had their studies interrupted. The platform allows them to continue their education online. tasks:

- Securing the open-source project and making an architectural decision
- working with Next.js in the frontend, project management using ClickUp

Back-end developer - internship

Mchain

Morocco, Rabat(remote) 05/2023 - 08/2023

Working on a trading platform using HyperLedger Fabric:

- communication between services using gRPC and dockerizing the services of the whole system
- working on the optimization of the platform using load-balancing and code optimization
- data visualization with Metabase, RabbitMQ clustering, Database coupling, testing components
- Coding the HyperLedger contract using JavaScript SDK
- writing CI config for GitHub Actions, project management using GitHub project

Full-stack developer - freelance

Kipinia

Morocco, Casablanca(remote) 06/2021 - 10/2021

- responsible for building a custom ERP for Kipina that answers the needs of Kipina clients and staff.
- deployment using Heroku and handling all the domain-related things(SSL, domain name, monitoring)
- Using MongoDB for data storage with MongoDB Atlas.
- Frontend builds using EJS, jQuery, and Bootstrap.
- For the backend, the ERP uses [Node.js/Express.js](#)
- project management using Trello.

Education

Web & Mobile development

YouCode

Safi, Morocco 09/2022 - 04/2024

Bachelor of Computer Science

University Cadi-Ayyad

Safi, Morocco 09/2018 - 06/2021
